ROBERT SMITH
Senior Implementation Manager I

info@qwikresume.com | LinkedIn Profile | Qwikresume.com

To secure a position with a well-established organization with a stable environment to further my career in the implementation/project management field.

EXPERIENCE

Senior Implementation Manager I
ABC Corporation - 2006 - 2014

- Led pre-sales, implementation, and data analysis support for SaaS Trucking intelligence product integrated with ECM data, GPS technology, and driver performance data to optimize fleet performance.
- Supported key customer personnel and stakeholders in multiple locations directly; routinely managed 12 to 15 accounts with 5 to 1000+ fleet vehicles.
- Oversaw vendor relationships.
- Partnered with Sales and customer stakeholders to develop estimates, proposals, scopes, change management and user adoption plans, and processes to track key delivery metrics.
- Collaborated with internal cross-functional teams (Product Engineering, Sales, Support) and technical resources from client teams, including external vendors, to implement and deliver applications on schedule and within budget.
- Directed meetings, training sessions, and conference calls; identified, managed, and resolved technical challenges throughout deployment process and developed recommendations for customer end-users.
- Led customer training support using many training tools, including online videos and WebEX for training.

Senior Implementation Manager
Delta Corporation - 2003 - 2008

- Directed project management processes and devised formal project plans for new software implementations and data refresh projects for existing .
- Consulting services and training to customers of this leading software development company Delivered onsite and offsite education services, ensured .
- Managed implementation process, documented business and technical requirements, and developed solutions to challenges.
- Interpreted business analytics, reviewed outcomes and coached C-Level employees.
- Key Achievements Specialized in working problem accounts without losing an account; maintaining revenue stream Developed recurring

7 Game changing trends

Why it's time to move to online accounting software

1. **The mobile workforce**
Your employees are on the move, but need to stay connected to the information they need. With cloud-based business applications, they can be "in the office" as soon as they turn on their mobile device.

2. **IT moves to the background**
Business outcomes—instead of technology—should drive your decisions. Cloud-based ERP allows your business to focus on the future instead of getting bogged down by outdated technology.

3. **The "Internet of Things"**
By collecting and analyzing the data from the things that surround us—from vending machines to medical devices—the Internet of Things (IoT) helps us identify patterns, track trends, and even predict behaviors.

4. **Security across devices and the cloud**
As your employees become more dependent on mobile devices, the risk for data theft increases, especially if the device is lost or stolen. Cloud computing offers organizations secure options to store and protect data in a mobile world.

5. **Increasing complexity of compliance**
Maintaining compliance in the face of ever-changing regulations, industry standards, and corporate quality initiatives is challenging. Flexible, cloud-based systems that can quickly adjust to new requirements reduce both the costs and risks to your business.
6. **Digital natives move up the corporate ladder**
Younger workers expect the business to capitalize on the data and technology assets that are available. Cloud-based ERP, ensures your business has the systems in place to support the next generation.

7. **The age of data analysis**
There is a world of data available, both inside and outside the organization, that can help your business thrive. Cloud-based ERP reduces the barriers to connect information that builds insight and fuels growth.
